An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

In accordance with MPEP 1302.04 the following typographical error has been corrected: In claim 1, line 11, "Y-axis driving units" has been changed to --Y-axis driving unit--. The preceding change was made since the antecedent for this language is recited in claim 1, line 6 as "a Y-axis driving unit".

The following is an examiner's statement of reasons for allowance:

Claim 1 and its dependent claims are allowed because claim 1 specifically requires an X-axis driving unit and a Y-axis driving unit supplying an embroidery frame with power, and a drive-control unit, the X-axis driving unit or the Y-axis driving unit and the drive-control unit comprising a controller outputting a linear motor driving signal; and a driver for driving a plurality of linear motors simultaneously.

The patent to Kwak is cited to disclose an apparatus for driving an embroidery frame of a multi-headed embroidery machine in which linear motors are controlled by a controller.

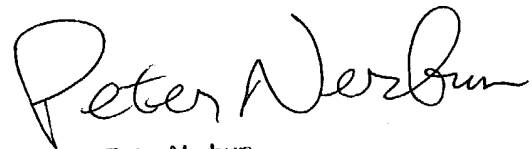

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on
